

Workspot.

Modernize IT with secure, 100% cloud-native SaaS cloud desktops.

You need an end user computing solution that brings maximum flexibility to the business so you can be ready for anything. The Workspot Enterprise Desktop Cloud platform delivers cloud desktops, workstations and apps from Microsoft Azure and Google Cloud Platform to any device, anywhere. Unlike rigid, legacy VDI, now you can deploy in days and add users in minutes!

Simple, Yet Enterprise-Class

- Eliminate VDI & physical desktop complexity
- Customize everything
- Manage globally from a single console
- Utilize Workspot APIs for workflow automation

Flawless Performance Users Love

- Place cloud desktops in the cloud region closest to each user
- Work from anywhere with a low-latency experience
- Address high-performance computing use cases

Zero Trust Security Architecture

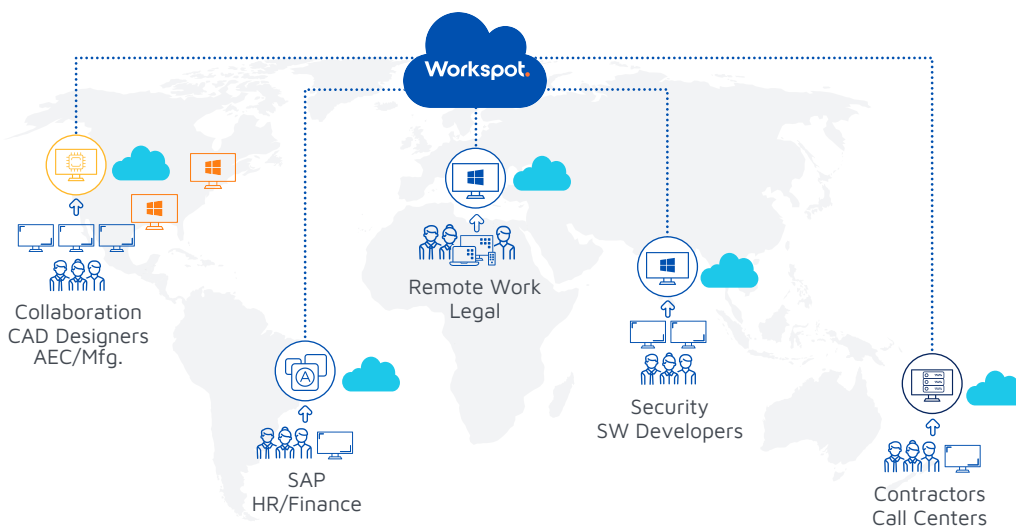

- Innovative control & data plane separation
- Incorporate all your security measures, including MFA
- Keep data off endpoints & safe in the cloud
- Strengthen IP protection

Highest Reliability & Robust BC Features

- Industry-leading 99.95% cloud desktop uptime
- Network Operations Center 24x7 real-time monitoring
- Multi-region failover
- Cloud desktop backup & restore, one click-PC DR

Purpose-built for the hyperscale public cloud, Workspot is always on, highly available, and instantly scalable across Microsoft Azure and Google Cloud.

What Are Customers Saying?

- ▶ "My IT team no longer needs to manage user devices to maintain a high-level of security."
- ▶ The ability to spin up cloud desktops with our corporate image, all in 5 mins, is huge for us."
- ▶ "We're seeing ridiculous speed with Workspot on Azure."
- ▶ "We're saving 40% of what we were spending per user, per device."
- ▶ "Workspot on Google Cloud is the perfect combination of price-performance & simplicity."

Why Workspot?

Unprecedented Business Agility

- Add cloud desktops across global cloud regions in minutes
- Hire the best people regardless of geography
- Reduce the need for branch offices while pursuing new opportunities globally
- Activate multi-region business continuity/disaster recovery features during a disruption to keep your business up and running

Lower Total Cost of Ownership

- Eliminate end user computing infrastructure complexity
- Free level 2/3 IT personnel to focus on strategic projects
- Reduce the frequency & cost of hardware refreshes
- Lower IT support burden with always up-to-date cloud desktops
- Maximize business uptime via 99.95% cloud desktop reliability
- Take advantage of flat-rate pricing options that include cloud compute for optimal budget predictability

Improved Collaboration & Productivity

- Mitigate latency for outstanding application performance
- Work together in real-time across project teams globally
- Securely access and collaborate within a common data environment
- Simplify joint-venture IT processes to accelerate product delivery

Customer Success

Go-Live Deployment
