

Simplify EUC Printing

PrinterLogic enables IT professionals to eliminate print servers and centrally manage direct IP printing on any IGEL OS powered endpoint device. With our centrally managed direct IP printing platform, you'll empower end users with all the features of enterprise print management using a secure, highly available, serverless printing infrastructure.

Deploy Edge OS Printing

Achieve Edge OS printer deployment through IGEL UMS without on premises infrastructure.

Eliminate Print Servers

Eliminate infrastructure costs, print related WAN traffic, single points of failure, and management overhead.

Centralize Management

Centrally manage printers, drivers and profiles without requiring a separate printing infrastructure.

Eliminate Scripting & GPOs

Deploy printers and push out updates with no scripting, GPOs or admin rights. Printer objects and profiles follow end users wherever they log in.

Deliver Native Drivers

Avoid driver conflicts in traditional or VDI environments. Deploy and manage both native and universal drivers for any network printer.

Speed EUC Adoption

Make Edge OS printing simple for admins to manage and easy for end users. Avoid printing challenges that slow EUC implementation.

Solution Features

SaaS or Virtual Appliance

Advanced Reporting

Session Printing Auto-Deploy

Secure Release Printing

Self-Service Portal

Printer Redirection Support

“ PrinterLogic's enterprise print management software is a perfect fit with our next gen Edge OS and our company direction as a whole.

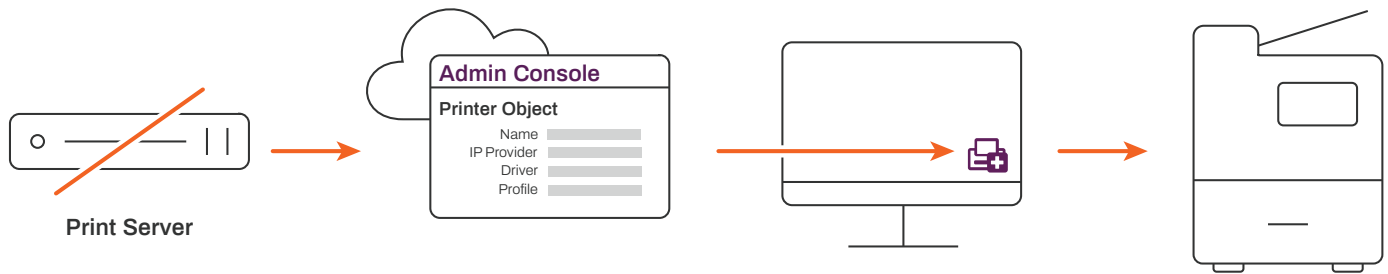

- Mathias Haas | Chief Technology Officer, IGEL

Eliminate Print Servers

Improve the health of your print environment with a serverless solution that empowers you to manage office, EMR, and affiliate printing—all from a single pane of glass.

Print Server

Migrate

Automatically import your existing printer objects and eliminate all print servers

Manage

Centrally manage printer objects, drivers, profiles, and settings

Deploy

Push new printers and updates to end users without scripting or GPOs

Print

Centrally manage Direct IP printing and keep print jobs local

“ Now that we use PrinterLogic, we can simply push one update and it will be automatically taken care of across all servers and printers. This has drastically reduced the time spent troubleshooting, and has eliminated the need to check every print server. Our deployment time for new printers is now incredibly fast—we just push once, and it's done.

- CRAIG MYERS | Senior Technical Specialist, Ohio Health
