Browser to Access SaaS Applications

Enterprises Use

Traditional Windows applications

Modern SaaS apps

Enterprises Need

Secure access

Full control and visibility

Great usability for both worlds

IGEL app portal provides latest browser and native VDI/DaaS apps

FORRESTER®

“In 2024, we’ll see SaaS sales hit 75% of new enterprise software purchases”

<https://www.forrester.com/blogs/predictions-2024-enterprise-software/>

Identity and Access Management

OS12 launched with OS level SSO integration for

okta

PingIdentity®

Today OS12 supports all OpenID Connect and OAuth 2.0 IDP

OS12 manages user identities only

Endpoint Disaster Recovery

- There is a better way – Simply IGEL it
 - Turn off devices
 - Plug in IGEL UDPocket
 - Turn power back on to device
 - Get back to working

“Simply IGEL it”

IGEL Preventative Security Model™ (PSM)

PSM enables

- Reducing Attack Surface by 95%
- Zero Trust Architecture
- Simplified End Point Security
- Significantly Reduced Ransomware
- Entra ID/CA, Workspace One & SSO
- Conditional/Contextual Access
- Smartcard: Imprivata/90M/AuthX

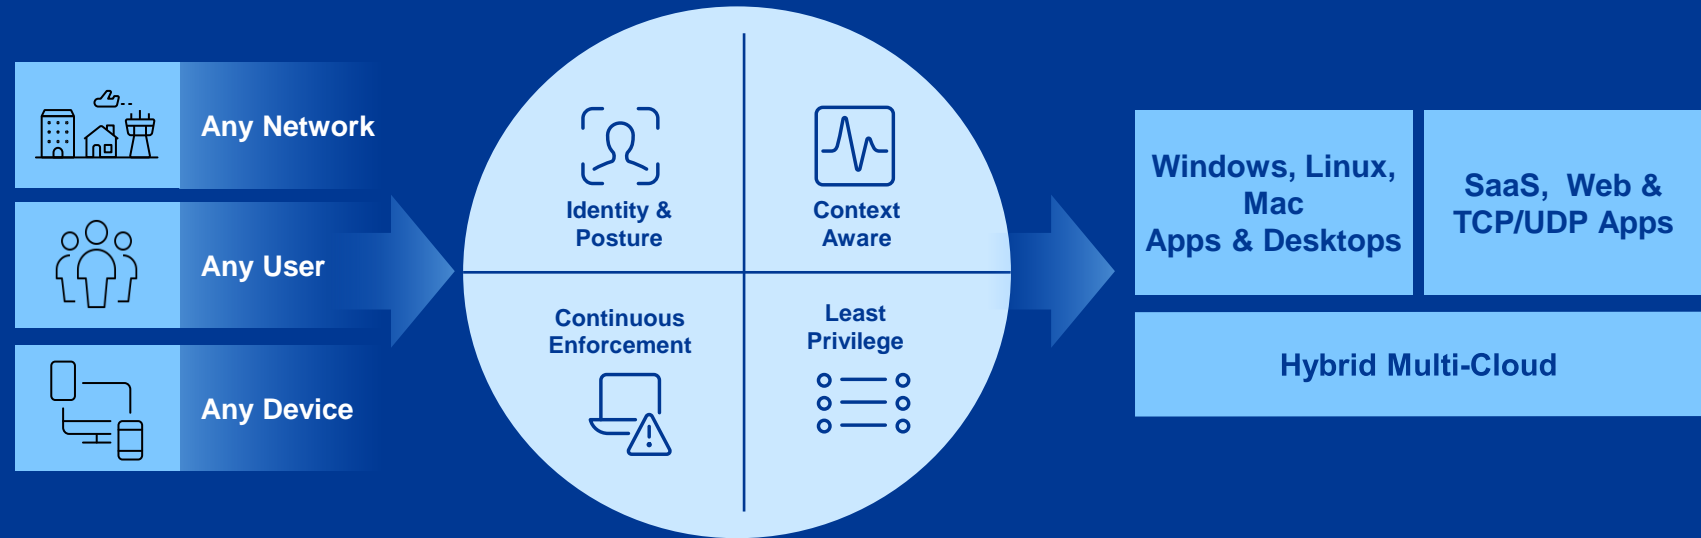

IGEE | citrix®

The image features the logos for IGEE and Citrix. The IGEE logo is in yellow, with a stylized sunburst icon above the 'E'. The Citrix logo is in white. A vertical bar separates the two logos. The background is dark blue with abstract, angular shapes in a lighter blue shade.

IGEL |  Microsoft

A history of innovating and delivering value for the Linux ecosystem

Azure Virtual Desktop

Early developer of Linux Client for Azure Virtual Desktop

Windows 365

IGEL Enhances the Performance of Microsoft Teams in Microsoft Azure Virtual Desktop and Windows 365

IGEL and Microsoft co-development results in optimized Teams experience on IGEL-powered devices accessing Azure Virtual Desktop and Windows 365

Partnership in continued innovation across Azure Virtual Desktop and Windows 365

Industry verticals

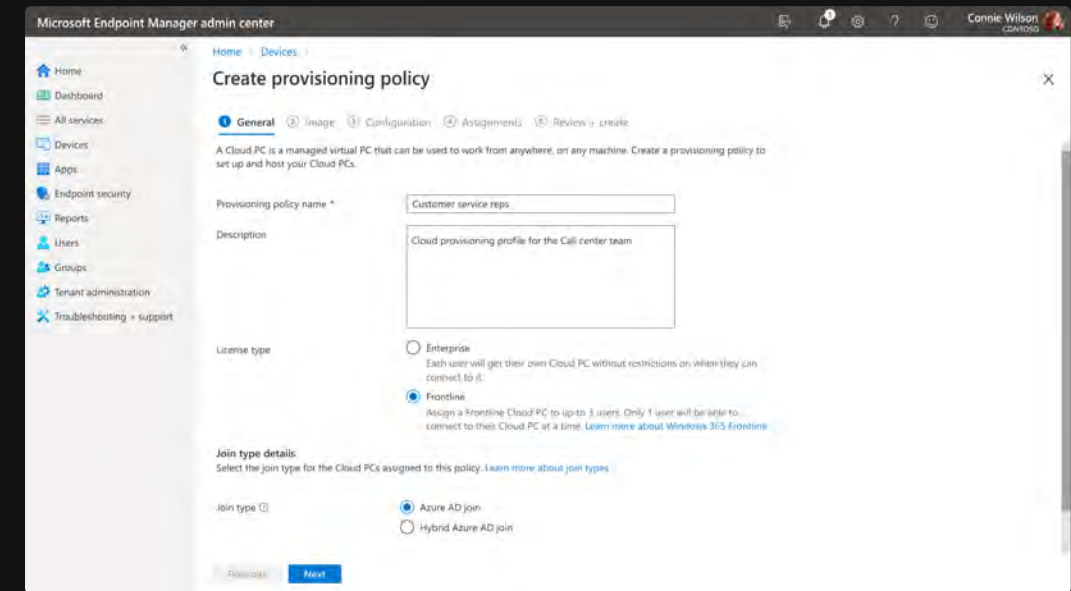

Imprivata and IGEL Expand Partnership to Enable Secure, Single Sign-On Access for Microsoft Azure Virtual Desktop and Windows 365 Cloud PC

Partners have co-developed an integrated solution that delivers compliant identity access and governance from IGEL OS for Microsoft Azure-powered workspaces

Advancing the virtualization opportunity in new industries with new use cases

IGEL and Windows 365 Frontline

- **Frontline, shift, and part-time workers typically don't need 24/7 access to their personal Cloud PC the way full-time employees do.** With Windows 365 Frontline, companies make the personal, secure, and persistent Cloud PC experience available to the right number of active users at any given time
- **Easily view and provision** Windows 365 Frontline Cloud PCs without requiring license assignment to specific users.
- Remove and add users as their workforce **dynamically changes**.
- Manage Windows 365 Frontline Cloud PCs using Microsoft Intune and leverage **Windows 365 Frontline Windows Update Optimization** to minimize disruption to end users during shifts.
- Have the flexibility to provide each user **multiple Windows 365 Frontline Cloud PCs**.
- Review concurrency and license usage trends using **Windows 365 Frontline concurrency report**.

Spotlight: solutions for healthcare and life sciences - "Touch and Go"
